

Loft Shelf Brackets

The loft shelf spans the width of the container and creates a wide (48 ") single shelf that hangs about 27 " below the container ceiling.

Brackets Are Sold As A Pair

Shelf Depth: 48"

Bracket Rating: 900lbs, 2 brackets included.

Create a loft area in the high space of the container, **2 brackets included**. Additional brackets can be supported from below. Provides approximately 5'3 " of clearance under the loft in a standard container or 6 feet 3 inches* under the loft a high cube container.

NOT INCLUDED – $\frac{3}{4}$ " plywood, use as a platform for the loft. Can be used with or without the platform.

Load ratings are per bracket and should not exceed 900 lbs per bracket arm or 1800 lbs. per bracket Pair.

At least two brackets needed to make a shelf. Adding more brackets allows for greater capacity.

**Space from the shelf to the floor depends on shipping container lash ring location.*
